

Project Abstract

TriviaHub - One-stop destination for thrilling and interactive quizzes

A quiz game website is an engaging platform where users can participate in interactive quiz across different formats, such as daily quiz, special event quiz, and quiz rooms created by users. With clearly defined Admin and User roles, the platform ensures smooth management and a structured experience, offering participants fun and educational opportunities to test their knowledge.

The daily quiz feature offers new questions each day, giving users a consistent way to practice and track their progress. Special event quizzes are designed around specific occasions, providing themed competitions for users. The admin plays a critical role in curating these daily and event quizzes, ensuring content quality, and managing the overall platform. Admins also oversee the creation of public quizzes and have the ability to moderate user-generated content to maintain fairness and accuracy. A key feature is the "Create a Room" option, where users can design their own quiz games. Users can invite friends or open the quiz to the public. The room creator has the ability to set the number of questions, choose time limits, adjust the difficulty, and pick quiz topics. The admin can monitor these user-created rooms, ensuring proper conduct and managing any disputes or issues that arise. Quiz topics include General Knowledge, Science, Sports, Mathematics, Analytical Reasoning, History, and Entertainment, allowing for a wide range of customizable quiz content.

The platform supports a tiered user structure, with participants taking on the role of quiz players and creators, while admins manage the platform's content and user activities. Real-time leaderboards, user score comparisons, and post-game discussions enhance the social experience. Admins can also monitor and manage these features, ensuring a fair and balanced user experience.

This quiz website provides a structured and dynamic platform with well-defined roles for users and admins. Users can participate in daily and special event quizzes, create their own quiz rooms, and enjoy a smooth, accessible experience across devices. Admins ensure the quality and fairness of quizzes, oversee user activities, and manage the platform's content, making it an enjoyable, community-driven hub for both casual quizzers and dedicated trivia enthusiasts.
